Education

National University of Singapore — Singapore, Singapore
Bachelor of Computing in Computer Science — *Aug. 2025 – May 2029*
Relevant coursework: Technical Management and Leadership, Design Thinking, Communication for Computing Professionals, Software Engineering, Data Structures and Algorithms

Awards

NUS ASEAN Undergraduate Scholarship — June 2025
One of five recipients selected from Myanmar based on academic performance and scholarship selection

The 28th STePs: Best Project - Platinum — April 2026
Awarded 1st place for CSE Environment Diagrams at the NUS School of Computing project showcase

Experience

Teaching Assistant for NUS Computing: CS1101S — August 2026 – Present
NUS School of Computing — *Kent Ridge Crescent, Singapore*
- Mentored 8 students through weekly tutorials on the Structure and Interpretation of Computer Programs (SICP) curriculum in Python
- Strengthened students' foundational concepts of functional paradigms and computational models through personalized learning tailored to each student's learning needs

Projects and Contributions

CP3108: Source Academy Frontend Development | *TypeScript, React* — January 2026 – May 2026
- Contributed to Source Academy, an educational, open-source programming platform used by 1,000+ NUS freshmen annually in introductory CS courses, by improving the UI/UX of the website based on student feedback
- Implemented an alternative program visualization in React and TypeScript, improving readability for students
- Collaborated across various operational teams to coordinate feature development, in-depth documentation, and regression testing

CS2103T: TuteeDex - Student Management Application | *Java, JavaFX, JUnit, Git* — September 2026 – Present
- Collaborated in a five-person team to extend an existing Java application into a desktop application for private tutors to manage student profiles and scheduling lessons
- Designed JavaFX interfaces using Figma, implementing reusable student cards, summary feedback, command controls, and an interactive help windows
- Maintained clear user guides, developer documentation, and UML diagrams to explain application behaviour and implementation decisions

Mr. Krabs | *OpenClaw API, Python* — April 2026 – April 2026
- Built a Telegram bot using OpenClaw to distinguish conversational messages from scheduling requests and create tasks directly from group-chat interactions
- Coordinated interfaces with teammates responsible for scheduling and agent components

Leadership and Community

NUS: Product Club | *Publicity Executive* — April 2026 – Present
- Designed audience-focused promotional graphics using established design principles while conveying brand identity

NUS: Game Development Group | *Publicity Director* — September 2025 – Present
- Collaborated with NUS Library as part of Discover Digital to host the NUS Library Collection Game Jam to raise awareness of Library resources to NUS students in the form of innovative games

Technical Skills

Languages: Java, Python, C, TypeScript, JavaScript, HTML/CSS
Frameworks/Libraries: React, Node.js, JavaFX, JUnit
Developer Tools: Docker, Git, Gradle, Yarn, Figma
